F·E·G·S was in good company as it garnered two gold Classic Telly Awards in the 30th Annual Telly Awards International Competition. The awards were given for art direction and copywriting. The Telly is the premier award recognizing outstanding local, regional, and cable TV productions, video and film productions, and online video. The winning entry, the *F·E·G·S Brooklyn Resource Center Orientation* film, is an interactive multimedia production, produced in both in English and Russian. It is viewed by more than 3,000 center participants each year. We are proud to be a gold Telly award winner, which went to only two percent of the more than 13,000 entries in all categories. *To watch the video, click the link below.* ■
